Notes to Editors:

NESF is a specialist investment company that invests primarily in operating solar power plants in the UK. It is able to invest up to 15% of its Gross Asset Value in operating solar power plants in OECD countries outside the UK. The Company's objective is to secure attractive shareholder returns through RPI-linked dividends and long-term capital growth. The Company achieves this by acquiring solar power plants on agricultural, industrial and commercial sites.

As at 31 March 2019, NESF has raised equity proceeds of £692m (including £100m of preference shares) since its initial public offering on the main market of the London Stock Exchange in April 2014. The Company's subsidiaries have financial debt outstanding of £269m, on a look-through basis and including at project level. Of this, £199m was long-term fully amortising financing, and £70m was drawn under a short-term credit facility.

NESF is differentiated by its access to NextEnergy Capital Group ("NEC Group"), its Investment Manager, which has a strong track record in sourcing, acquiring and managing operating solar assets. WiseEnergy is NEC Group's specialist operating asset management division and over the course of its activities has provided operating asset management, monitoring, technical due diligence and other services to over 1,300 utility-scale solar power plants with an installed capacity in excess of 1.9 GW.

Further information on NESF, NEC Group and WiseEnergy is available at nextenergysolarfund.com, nextenergycapital.com and wise-energy.eu.
